EYES

## SYNCHRON EYES

98-SEC \$ 14.75

Six Simple Steps to the Perfect Eye Set Everytime!

1

The flexible eye capsule securely holds any 32 mm base eye.

2

Simply slide eye into capsule.

- Real Looks
- Real Time Savings
- Real Profits

3

Level the eye by aligning pupil with index marks on back of capsule.

4

Place the right eye capsule into right eye of mannikin with a small amount of clay or epoxy to hold in place.

5

Blend the line in with a very small roll of clay.

6

Tuck eye skin between capsule and glass eye.

Synchron-Eyes™ Capsules can be used in any mannikin by simply drilling the eye socket out with a 1 1/2" spade bit. Increase the diameter but do not increase the depth. Then simply insert the eye capsule and eye.

*The perfect eye set everytime!*

### EYE PROTECT

Designed and specially formulated to protect acrylic, plastic and glass eyes from paint overspray. Eye Protect is painted over the eyes before painting a mount. When finished with the mount, simply peel the Eye Protect off of the eyes. Fast drying time. Can be used with all paints.

91-EP2 2 ozs \$ 12.00

**NEW**

### NATURE'S OWN EYE CLEAR COAT

Protect acrylic, plastic, polymer and glass eyes from paint overspray. Dip eyes in clear coat before setting or paint on after eyes are set. Easy to peel off. Dries fast and clear.

91-EPCC 1.5 ozs \$ 8.00

### WHITETAIL DEER EYE SETS

Eliminates the need to build the eye orbit with clay.

98-ES1 \$ 11.75

*Eyeset installed on form. Eyes sold separately.*

*Eyesets prior to eye installation*
