## BASE & HABITAT

### Base Construction

By Taxidermy Training Unlimited  
With Randy Nelson (1¾ Hrs)

In this video, Randy shares his unique techniques and products that he uses to create a very rustic winter scene base. The video covers complete base construction, including creating dirt, snow, ice and water. If you want to create a realistic habitat for your bases, this video is a must.

### Habitat Construction (for a Lifesize Mount)

By Taxidermy Training Unlimited  
With Randy Life (1½ Hrs)

Randy demonstrates his technique for making custom artificial rock, and from there you can create as many as you want in your habitat, in various shapes and sizes. Covers how to determine proper placement of foliage and grasses, and how to incorporate real soil and moss. Also includes how to construct a customized "anchor" for a detachable tree (the one in this video has a real hornet's nest) to facilitate easier transportation by customer. This feature is optional, so you can still create the habitat without the tree.
