Carcass Casting

By Taxidermy Training Unlimited

With Jean Roll (1¾ Hrs)

Jean demonstrates her method for producing a custom manikin using the carcass casting method. In this video, Jean uses a still born baby Aoudad, but this method will work for any other small mammal. Beginning with a skinned carcass, Jean describes how to first determine the desired pose, and then proceeds with the steps required for creating a plaster mold. This method is for a ONE-TIME use mold.

Home Butchering Your Own Deer

By Second 2 Nature Taxidermy Supply

With Dan Chase (½ Hr)

Dan explains how he field dressed this deer. He then butchers the entire deer. He starts by removing the front shoulders. He removes the Tenderloin. Splits the hips and trims the flank. Hips are removed from the body and separated from legs. The top portion of the hips are removed for Rump Roasts. The bottom of the legs are removed at the knee. The hind quarter is then trimmed, deboned and cut up for frying. The Backstrap is removed and cut up for frying. The neck is deboned. The front shoulders are separated at the knee and cut for roasts.
